

**Dear Valued Retailer,**

Here at Appalachia, we strive to create an environment that elevates our products, processes and the overall customer experience. We build entry to mid-level homes and we're proud of our amazing turn rates and reliable service team members.

Each model is beautifully designed and skillfully constructed to meet our high-quality standards. Our homes are divided into three product lines, defined by their price points and features.

**The Eagle Series:** Get back to the basics. These factory select homes are ready to sell.

**The Tradition Series:** This series commonly referred to as the bread and butter of Appalachia is where form meets function. With the right amount of flash and a solid construction base, this line represents our all-time bestselling products.

**The Fusion Series:** A cut above, these homes have most everything Appalachia can offer. With intricate floorplans and elaborate features, this series represents upscale features and designs that can bridge the gap between Appalachia and your high-end products.

Please visit our website or contact your Customer Success Manager to see photos, take a virtual tour, or discuss quotes and turn rates.

We look forward to partnering with you soon.

**Respectfully,  
The Appalachia Team**
